

Film Development by Mail

MidtownFilmLab.JoshFromGR.com

I specialize in C-41 color negative film, black and white negative film, and ECN-2 color negative processes in 35mm and 120 (or similar formats). If you have any specific needs that don't quite fit this model, please don't hesitate to reach out! I'd be more than happy to work with you to find the perfect solution.

For development, I charge by the development tank. Don't forget to check out the online Price Estimator to get more info!

I use a Sony A6600 to scan your film including the sprocket holes and process the images with Negative Lab Pro. I carefully go through each frame to remove as much dust and scratches as possible, along with color correcting to ensure your film photos look their absolute best.

I offer 4x6 or 5x7 print sets. A set will be prints of all photos in an order. Prints are done on a Canon Pixma G6020 and typically will use Canon papers and inks. The prints come with a quarter inch white border to frame your photos.

How It Works

1. Fill out this form on **both sides**.
2. Package the form and film rolls in a padded envelope and mail to:

Midtown Film Lab
225 Michigan St NW #1014
Grand Rapids, MI 49501
3. You will get an email when your film arrives with your total and a Venmo link (let me know if you need a different payment method). If you opt for Express Processing, your payment will be charged and your order will start being processed.
4. Once your film is developed, you will get an email with a OneDrive link to download your photos as JPGs and TIFFs. The OneDrive link will remain active for at least 2 weeks.
5. If you selected to have your negatives returned, they will be cut into strips of 5 or 6 frames (3 frames for 120 film) and mailed back to you in a paper envelope. If you would like, I can also put them in archival sleeves for an additional cost.
6. Finally, if you ordered prints, they will be shipped out within a week after you receive your scans. When they are shipped you will get an email with a tracking number.

Limit of Liability Submitting any tangible or electronic media, image, data, file, card, disc, device, film, print, slide or negative for any purpose, such as processing, printing, duplication, alteration, enlargement, storage, transmission, or other handling, constitutes an AGREEMENT that any loss or damage to it by our company, subsidiary or agents, even though by our negligence or other fault, will only entitle you to replacement with an equivalent quantity/size of unexposed photographic film or electronic media. Except for such replacement, our acceptance of the media, image, data, file, card, disc, device, film, print, slide or negative is without other liability, and recovery for any incidental or consequential damages is excluded. No expressed or implied warranty is provided.

Order Form

For development, I charge by the development tank. Tanks can contain up to 3 rolls of 35mm film or 4 rolls of 120 film. All rolls in a tank must be the same film size, get the same chemical process (C-41, B&W, or ECN2), and receive the same push/pull treatment. There is no extra charge for push/pull processing, but it is applied to all rolls in the tank.

Scans are just \$10 per roll for full frame 35mm and 120, and \$20 per roll for half-frame rolls or 220 rolls, which take a bit longer to scan.
